

Energy Saving Trust invites you to attend a workshop to disseminate and discuss the key findings of CompliantTV and MarketWatch.

CompliantTV measures the effectiveness of the EU Energy Labelling and Ecodesign Directives for TVs. **MarketWatch**, coordinated by Energy Saving Trust, brings together a pan-European consortium of 16 partners to bolster market surveillance activities addressing domestic energy-using products.

CompliantTV and Marketwatch have gathered significant data to assess the big picture of compliance across a wide range of energy-using product types.

At the workshop we will share with you:

- ✔ Product laboratory testing results
- ✔ Results of shop inspections of the energy label
- ✔ Outcomes, trends and policy recommendations
- ✔ Challenges and learnings from a retailer and manufacturer perspective
- ✔ Feedback from the projects' engagement with MSAs and industry
- ✔ Effectiveness of the implementation of Energy Labelling and Ecodesign regulations
- ✔ Key learnings and next steps for market surveillance
- ✔ Speakers giving the view from industry, consumer organisations and policy position
- ✔ Panel Q & A

Please RSVP by 22nd September to Thomas.Murphy@est.org.uk or call 020 7654 2361.

We look forward to seeing you at the workshop.

Tuesday 29 September 2015

9:00am - 12:30pm

Conference Room, Royal Society
6-9 Carlton House Terrace
London SW1Y 5AG
